INTRODUCTION

CANADIAN TRADE INDEX has been the authoritative guide to buying and selling in Canada for 91 years. It contains a comprehensive list of Canadian manufacturers having more than a local distribution for their products, irrespective of membership in The Canadian Manufacturers' Association. The INDEX is kept up-to-date by contact each year with listed companies who are asked to revise or confirm their listings. It is the foremost directory of its kind in Canada today. While great care is taken in compiling the listings, the publishers cannot assume liability for losses arising from any statements, errors or omissions.

HOW TO USE THE CANADIAN TRADE INDEX

Volume 1

1. Display Advertisers — pages prefixed A

Cross references to the display ads follow the companies' listings in Section B.

2. Classified List of Products — pages prefixed B

When you require a specific product, turn to this section where you will find in alphabetical order some 10,000 classifications of products made in Canada with the names and locations of companies making them. Frequent cross references will help you identify the product listing you want. Supplementing these lists are informative advertisements with additional information about a company's product. Those firms engaged in exporting are indicated by a star preceding their name. For further guidance on the use of this section see page B-2.

3. Trade Marks Section — pages prefixed C

When you know the trade name but not the name of the company manufacturing the product, consult this section. Then refer to Section D for full information about the company.

4. Product Headings — pages prefixed H

An alphabetical listing of products classified in Section B.

Volume 2

5. Trade Section — pages prefixed D

If you want to contact a company engaged in exporting, look here for their telephone number, fax number, foreign representatives, contact names and geographical areas that these manufacturers are exporting to.

6. Distributor Section — pages prefixed E

7. Alphabetical List of Manufacturers — pages prefixed F

If you want to contact a company, look here for head office address, telephone number, branch and sales offices, names and titles of senior operating executives. Other data included — parent and subsidiary companies, principal products, brand names, export contacts, toll free number, fax, telex, annual sales, company size.

8. Geographical Section — pages prefixed G

If you are on the road and need to know what manufacturers are in the area, turn to this section where head office and plants of listed companies are arranged alphabetically by municipality, by province.

9. Product Headings — pages prefixed H

An alphabetical listing of products classified in Section B.

If you like Moyno ... You'll love Bornemann!

Reduced rubbing velocity less wear!

With Bornemann's progressive cavity pump design, the pitch of the rotor and stator have been increased while the diameter of the rotor has been decreased.

Result: Bornemann effectively increases the life of both rotor and stator.

Reduced bearing loads.

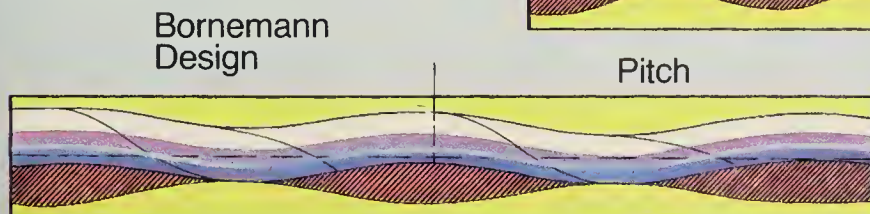

Reduced back-pressure (or thrust) against the rotor means lighter axial loading – and less load stress on the bearings and universal joint.

The difference in thrust loading between the Bornemann design and a conventional cavity pump of equal capacity can be as high as 60%!

Lower shear stress.

The Bornemann rotor design is much less eccentric than previous designs.

Even though all progressive cavity designs are low shear pumps, you'll find ours gives even better handling of shear-sensitive liquids.

Rugged, efficient Cardan joint.

The Cardan joint in the Bornemann pump is a simple, easy-to-service version of a proven universal joint as used by the automotive industry.

Without complex gears, it gives highly efficient power transmission over the full range of drive angles required by the pump. It offers longer times between service, and less downtime.

The right pump for each application.

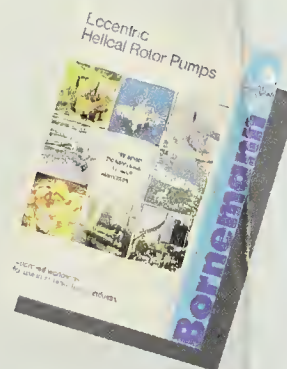

Bornemann has pumps to handle all types of liquids, of low or high viscosities, abrasive or non-abrasive; liquids containing solids or fibrous matter; and media with entrained gases.

Bornemann progressive cavity pumps come in a full range of sizes and

configurations. One, two and four-stage models are available with capacities up to 400 m³/hr (1750 US GPM) and pressures up to 100 bar (1450 psi).

Free technical data.

For more information about the most advanced progressive cavity pump design in North America, contact Bornemann for free technical literature.

Coated steels

Premier Commercial Coating

ASTM Z001 (G01) to Z700

Premier is a continuous hot dipped galvanized steel sheet most commonly specified as Z275 (G90). The coating is characterized by the "full spangle" zinc crystal appearance.

Widths 75 mm (3") to 1525 mm (60")

Thicknesses 0.30 mm (0.012") to 4.27 mm (0.168")

Premier Minimized Spangle

ASTM Z180 (G60) to Z275 (G90)

Automotive - 60G/60G to 100G/100G

This galvanized sheet product features controlled zinc crystal size for less spangle relief; it is intended for painted semi-exposed applications.

Widths 75 mm (3") to 1525 mm (60")

Thicknesses 0.38 mm (0.015") to 4.27 mm (0.168")

Premier-Dualcoat -

Is a continuous hot dipped galvanized steel sheet, with most of the zinc removed from one side of the sheet. This differentially coated steel typically has a full zinc coating Z275 (G90) on one side and a Z001 (G01) coating on the other side. Other differential coatings such as Z180 (G60) over Z001 (G01) are available.

Widths 75 mm (3") to 1525 mm (60")

Thicknesses 0.68 mm (0.027") to 4.27 mm (0.168")

Satincoat Galvanneal

ASTM ZF001 (A01) to ZF120 (A40)

Automotive - 40A/40A and 50A/50A

Satincoat-Galvanneal is produced as a continuously hot dipped galvanized product with a coating that is completely zinc-iron alloy. Satincoat has a spangle free, matte grey uniform appearance. The zinc-iron alloy coating provides an excellent base for post-painting.

Widths 75 mm (3") to 1525 mm (60")

Thicknesses 0.35 mm (0.014") to 4.27 mm (0.168")

CSP Sheets Z610 min. (2 oz. min.)

This material has 610 grams per square metre (2.0 oz./sq. ft.) zinc coating mass, total both sides.

Widths Culvert widths up to 1525 mm (60")

Thicknesses 1.0 mm (0.040") to 4.27 mm (0.168")

Galvalume

Galvalume AZ150 and AZ180 is an aluminum/zinc alloy coating consisting of approximately 55% aluminum, 43.4% zinc and 1.6% silicon by weight. Galvalume (AZ150) steel delivers at least twice the corrosion resistance of Z275 (G90) galvanized steel. It also delivers heat resistance similar to Type 1 aluminum-coated steel. Galvalume steel is available both prepainted and plain.

Widths 1220 mm (48")

Thicknesses 0.30 mm (0.012") to 2.00 mm (0.078")

Tin Mill Products

Electrolytic Tin Plate -

Is produced as single reduced or double reduced in a complete range of tin coatings, base weights (thicknesses) and sizes in sheets and coils.

Electrolytic Chromium Coated (TFS-CT) -

Is produced as single and double reduced product in a complete range of thicknesses and sizes, in both sheets and coils.

Prepainted Steels

"Pre-Coat" -

Is a prepainted steel product produced from substrates of Cold Rolled, Galvalume, Galvanized or Tin Mill Products painted in coil form. The coatings are inorganic and organic-based and are applied continuously. Paint coatings include fluorocarbons, plastisols, epoxies, silicone modified (polyesters and acrylics), thermoset acrylics, polyesters, modified polyesters, amine alkyds and solution vinyls.

Widths Maximum 1525 mm (60")

Thicknesses Tin Mill Products 0.20 mm (0.008") to 0.37 mm (0.015")
Cold Rolled 0.37 mm (0.015") to 1.30 mm (0.051")
Galvalume and Galvanized 0.30 mm (0.012") to 1.30 mm (0.015")

This listing hints at the wide choice of Dofasco flat rolled steels. With variations in technical specifications, including carbon content, ASTM and SAE groupings, the choice is virtually limitless.

Whenever price, quality, design, and service allow a choice, BUY CANADIAN. Canadian manufactured goods are recognized the world over for their quality and workmanship.

You are using the INDEX to find Canadian-made products - your customers use it too. You should be advertising under all classifications that list your products.

FIRST IMPRESSIONS COUNT

**ESSO BELIEVES IN FIRST IMPRESSIONS. So Should You.**

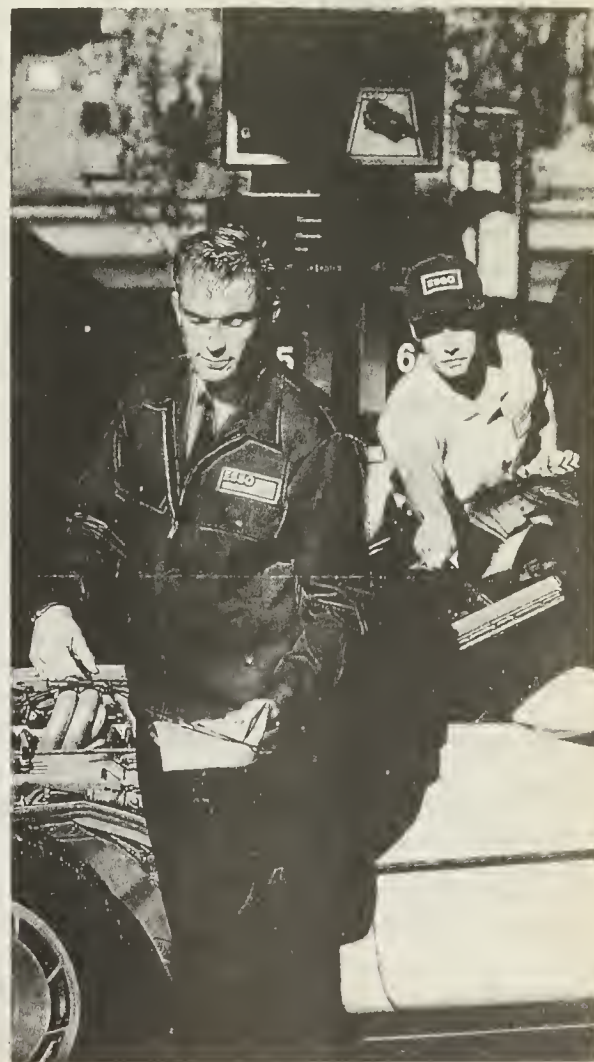

That's why over 800 ESSO Service Stations in Ontario alone use **Mark's Work Wearhouse** for their uniforms, as do thousands of other companies across Canada.

We've got it all, the best products, the best service, and a hassle-free guarantee. We can outfit any type of company from heavy industrial to manufacturing, to service or administrative. We can supply everything from uniforms to specially crested garments for safety awards. When it comes to clothing or footwear we mean business.

Find out how easy it is to have an account by calling your nearest Mark's Work Wearhouse, or we can have an industrial sales representative drop in to see you at your convenience, with details.

More than just great workwear.
